

PROCESS TIMER T4

The T4 timer is a simple battery-powered timer to control process times with a loud buzzer and flashing light. Simply set the time to the desired process time like a kitchen timer, and when the green button is pressed, the timer counts down for the set amount of time before sounding the alarm.

There is a unique early warning before the end of countdown that calls the operator to the tank when the cycle is nearly done. This can be set to any time you choose.

FEATURES

- Durable!
- Loud buzzer is 103dB.
- Waterproof enclosure is rated IP65.
- Convenient to set the time like a kitchen timer.
- 9V battery is easily replaceable.
- Many behaviors are built-in such as: count down, count up, repeat cycle, cannot cancel, accumulate time, guard duty.
- Easy to mount with two screws, optional magnets, or even tape!
